

right place. right time. every time.

service overview

equine services

NGL pioneered the Next Flight Out business back in 1971 when we began our mission critical transportation services. Since then, we have developed systems and processes that insure the highest levels of on-time service in the market.

Today, we are recognized as a leader in the veterinary science field with the transportation of live specimens. NGL has integrated stringent Standard Operating Procedures to support this industry where on-time shipments are crucial to be in coordination with mare breeding schedules. All shipments are moved in temperature controlled environments while in collaboration with all partners to give full visibility during initial shipments and reverse logistics for Equitainers.

Geographic Reach

Our extensive network of couriers can provide local pickup and delivery service around the corner or around the world, providing more people with access to live specimens regardless of rural or international distances.

Customized Time-Critical Transportation Services for Live Specimens Sameday Ground Courier, Domestic Sameday Air Service, and Express International Service

24/7/365 Availability

We understand the importance of coordinating shipments with breeding schedules to allow proper insemination. That is why we are available around the clock, including weekends and holidays. Our offices are staffed by NGL employees 24 hours a day, 7 days a week, 365 days of the year. We are always available to provide weather condition updates, information on standards of care, and the status of your very critical shipment.

Superior Performance – Near 100% failure-free service

- Our on-time performance is simply unrivaled in the industry.
- For each step in the process, we adhere to the most stringent Standard Operating Procedures in the industry with detailed standard of care procedures.
- Our standard operating procedures include system-driven, redundant quality control measures to make sure all temperature control requirements are maintained throughout their trip.
- Our state-of-the-art transportation management system monitors the completion of 42 unique steps and ensures accuracy, IATA compliance, and on-time delivery.
- IATA trained Customer Service Reps that can help assist and explain regulatory domestic and international requirements.

Superior Systems – Real Time Visibility and Proactive Notifications

- Our online shipping website is unmatched for its level of visibility and ease of use.
- Intuitive online shipping and tracking that provides you with up-to-the-minute complete information regarding your shipment while in transit to you and your partners.
- Automatic proof of delivery and status updates via the Web, phone, fax, or email – customized to your exact specifications and needs.
